36-3539: Anti-CD20 / MS4A1 (B-Cell Marker) Monoclonal Antibody(Clone: B9E9)-PE

Clonality: Monoclonal

Clone Name: B9E9
Application: FACS,IF
Reactivity: Human
Conjugate: PE
Gene: MS4A1
Gene ID: 931
Uniprot ID: P11836

APY; ATOPY; B-lymphocyte antigen CD20; B-lymphocyte cell-surface antigen B1; Bp35; Fc

epsilon receptor I beta chain; Fc Fragment of IgE high affinity I receptor for beta polypeptide; FCER1B; High affinity immunoglobulin epsilon receptor subunit beta; IgE Fc receptor subunit

Alternative Name: beta; IGER; IGER; IGER; LEU16; Leukocyte surface antigen Leu-16; Ly44; Membrane spanning

4 domains subfamily A member 2; Membrane-spanning 4-domains subfamily A member 1

(MS4A1)

Isotype: Mouse IgG2a, kappa

Immunogen Information: Lymphoblastoid cell line Daudi

Description

Recognizes a protein of 33-37kDa, identified as CD20 (Workshop V; Code CD20.12). B9E9 recognizes extracellular domain of CD20. The epitope is similar to or identical to that recognized by other CD20 antibodies including Leu-16 and B1. This MAb can be used for immunophenotyping of leukemia and malignant cells, B lymphocyte detection in peripheral blood, B cell localization in tissues and B lymphocyte purification by immunosorbent methods. CD20 is a non-lg differentiation antigen of B-cells and its expression is restricted to normal and neoplastic B-cells, being absent from all other leukocytes and tissues. CD20 is expressed by pre B-cells and persists during all stages of B-cell maturation but is lost upon terminal differentiation into plasma cells. Protein passes throµgh the membrane 4 times with both ends in cytoplasm and exposes one short and one longer loop to the external environment. CD20 is not glycosylated in resting B cells and its cytoplasmic domains are differentially phosphorylated upon activation. It acts as a calcium channel involved in B-cell activation and cell cycle progression.

Product Info

Amount: 0.5 ml at 100µg/ml

Antibody Purified from Bioreactor Concentrate by Protein A/G and conjugated to various

Content: reporter molecules. Prepared in 10mM PBS with 0.05% BSA and 0.05% azide. Contact us if you

require this Ab in a different format.

Storage condition: Antibody with azide - store at 4 to 8°C. Antibody is stable for 24 months. Non-hazardous.

Application Note

Flow Cytometry: 5ul per test per one million cells (or 5ul per 100ul of whole blood);Immunofluorescence (1:50-1:100)
