32-2147: ALDOB Recombinant Protein

Fructose-bisphosphate aldolase B,Liver-type aldolase,ALDOB,ALDB,Aldolase B fructose-**Alternative Name:** bisphosphate, ALDO2, aldolase 2, Aldolase B fructose-bisphosphatase.

Description

Source: Escherichia Coli. ALDOB Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 388 amino acids (1-364) and having a molecular mass of 42kDa,ALDOB is fused to a 24 amino acid His-tag at Nterminus & purified by proprietary chromatographic techniques. ALDOB is a tetrameric glycolytic enzyme which catalyzes the reversible cleavage of fructose 1-phosphate into dihydroxyacetone phosphate and glyceraldehyde. Fructosebisphosphate aldolase B (ALDOB) is one of 3 known aldolase isoenzymes, and is located in the kidney and the small adult intestine where it is linked with aldolases A or C. ALDOB is regulated by Insulin and glucagon and is implicated in hereditary fructose intolerance disease.

Product Info

Amount: 20 μα

Purification: Greater than 95.0% as determined by SDS-PAGE.

The ALDOB solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 1mM DTT, 10% glycerol Content:

and 0.1M NaCl.

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods Storage condition:

of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or

BSA). Avoid multiple freeze-thaw cycles.
