## 32-2174: Bovine Alkaline Phosphatase Native Protein

Alternative Name: EC 3.1.3.1,IAP,AP,ALPI,Intestinal-type alkaline phosphatase,Intestinal alkaline phosphatase.

## **Description**

Source: Calf Intestine. The Alkaline Phosphatase is purified by affinity chromatography, which results in an enzyme of high specific activity and purity. Alkaline Phosphatase is Dimeric protein having a molecular weight of 140 kDa, one Zn++ ion is tightly bound to each subunit, and another less tightly bound is involved in the catalytic reaction. Mg++ stimulates the catalysis. The binding site for Mg++ is different to that of Zn++, but will be occupied by excess Zn++ followed by loss of enzyme activity.

## **Product Info**

Amount: 5 mg

Content: 50% glycerol, 5mM MgCl2, 0.1mM ZnCl2 and 5mM TRIS, pH 7.0.

**Storage condition :** AP should be stored at 4°C. Please Do-Not freeze.

## **Application Note**

>1000 U/mg (pH 9.6, 25°C and 0.025M glycin, 10% glycerol as buffer.
