

32-2181: BDH1 Recombinant Protein

Alternative Name : D-beta-hydroxybutyrate dehydrogenase,mitochondrial,BDH,3-hydroxybutyrate dehydrogenase,BDH1,SDR9C1.

Description

Source : E.coli. BDH1 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 318 amino acids (47-343) and having a molecular mass of 35.3kDa.BDH1 is fused to a 21 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. BDH1 belongs to the short-chain dehydrogenase/reductase gene family. BDH1 forms a homotetrameric lipid-requiring enzyme of the mitochondrial membrane and has a specific necessity for phosphatidylcholine for optimal enzymatic activity. BDH1 catalyzes the interconversion of acetoacetate and (R)-3-hydroxybutyrate, the 2 main ketone bodies formed during fatty acid catabolism.

Product Info

Amount : 5 µg
Purification : Greater than 85% as determined by SDS-PAGE.
Content : The BDH1 solution (0.25mg/ml) contains 20mM Tris-HCl buffer (pH8.0), 30% glycerol, 0.2M NaCl, 2mM DTT and 0.1mM PMSF.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
