32-2205: rCarboxypeptidase-B Recombinant Protein

Alternative Name: Carboxypeptidase B,Cpb1,Cpb.

Description

Source: Escherichia Coli. Recombinant Rat Carboxypeptidase-B is expressed in E.Coli having a Mw of 35kDa is purified by standard chromatography techniques. Recombinant Rat Carboxypeptidase-B is free from foreign enzymes such as carboxypeptidase A & chymotrypsin. Recombinant Carboxypeptidase-B is free from protease inhibitors such as PMSF and EDTA. Carboxypeptidase B (EC 3.4.17.2) catalyzes hydrolysis of the basic amino acids lysine, arginine and ornithine from the C-terminal end of polypeptides. The Mw was found to be 34.5 kda, optimun pH-7.9, and pI-6. Carboxypeptidase B is inhibited by arginine, lysine and ornithine. The enzyme is not inhibited by di-isopropylfluorophosphate (DFP), but it is inhibited by metal chelating agents, e.g., EDTA, 1,10-phenanthroline.

Product Info

Amount: 15 mg

Purification : Greater than 90% as determined by SDS-PAGE.

Content: The protein was lyophilized with 100mM NaCl and 20mM Tris pH-7.5.

Recombinant Rat Carboxypeptidase-B although stable at room temp for 1 week, should be stored

Storage condition: desiccated below -18°C. For long term storage it is recommended to add a carrier protein (0.1%

HSA or BSA). Please prevent freeze-thaw cycles.

Application Note

It is recommended to reconstitute the lyophilized Rat Carboxypeptidase-B in sterile 18MΩ-cm H2O not less than 100µg/ml, which can then be further diluted to other aqueous solutions. 170 units/mg protein.
