

## 32-2362: GLO1 Recombinant Protein

**Alternative Name :** GLYI,GLOD1,GLO1,Glyoxalase-1,Lactoylglutathione lyase,Methylglyoxalase,Aldoketomutase,Ketone-aldehyde mutase,Glyoxalase I,S-D-lactoylglutathione methylglyoxal lyase,Glx I.

### Description

Source : Escherichia Coli. Glyoxalase-I Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 184 amino acids and having a molecular mass of 20.7 kDa. Glyoxalase-1 is purified by proprietary chromatographic techniques. GLO1 is involved in the catalysis and formation of S-lactoyl-glutathione from methylglyoxal condensation and reduced glutathione. GLO1 is linked to HLA and is localized to 6p21.3-p21.1, between HLA and the centromere. GLO1 enzyme is abundantly expressed and present in numerous tumor cell lines, in which its concentration is often upregulated ubiquitously. GLO1 is a major susceptible gene for autism in an ethnic Chinese population from Taiwan. GLO1 might be involved in the pathophysiology of mood disorders. GLO1 plays a role in the pathophysiology of mood disorders. Overexpression of GLO1 is associated with kidney tumor.

### Product Info

**Amount :** 50 µg  
**Purification :** Greater than 90.0% as determined by SDS-PAGE.  
**Content :** Glyoxalase-1 solution containing 20mM Tris-HCl pH-8, 1mM DTT and 10% glycerol.  
**Storage condition :** Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
