

32-2369: GLRX5 Recombinant Protein

Alternative Name : Glutaredoxin-related protein 5 mitochondrial, Monothiol glutaredoxin-5, GLRX5, C14orf87, glutaredoxin 5, GRX5, FLB4739, PR01238, PR01238, MGC14129.

Description

Source : Escherichia Coli. GLRX5 Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 177 amino acids (1-157 a.a.) and having a molecular mass of 18.8 kDa. GRX5 is fused to a 20 amino acid His Tag at N-terminus and purified by proprietary chromatographic techniques. GLRX5 is small redox enzyme of approximately 100 amino acids which uses glutathione as a cofactor. GLRX5 is a mitochondrial protein, which is evolutionarily conserved. GLRX5 is oxidized by substrates, and reduced non-enzymatically by glutathione. GLRX5 is involved in the biogenesis of iron-sulfur clusters that are required for normal iron homeostasis. GLRX5 is necessary for normal regulation of hemoglobin synthesis by the iron-sulfur protein ACO1. Defects in the GLRX5 gene are a cause of anemia sideroblastic pyridoxine-refractory autosomal recessive (PRARSA).

Product Info

Amount : 25 µg
Purification : Greater than 85% as determined by SDS-PAGE.
Content : GLRX5 solution containing 20mM Tris-HCl buffer (pH8.0), 20% glycerol and 0.1M NaCl.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
Amino Acid : MGSSHHHHHH SSGLVPRGSH MSGSLGRAAA ALLRWGRGAG GGGLWGPVGR AAGSGAGGGG
