

32-2464: IdhA Recombinant Protein

Alternative Name : D-lactate dehydrogenase,D-LDH,Fermentative lactate dehydrogenase,IdhA,hsII,htpH,b1380,JW1375.

Description

Source : E.coli. IdhA E.Coli Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 353 amino acids (1-329) and having a molecular mass of 39.1kDa.IdhA is fused to a 24 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. D-lactate dehydrogenase (Idha) is a member of the D-isomer specific 2-hydroxyacid dehydrogenase family. In enzymology, an Idha (cytochrome) is an enzyme which catalyzes the chemical reaction. Therefore, the 2 substrates of the Idha enzyme are (D)-lactate and ferricytochrome c, whereas its 2 products are pyruvate and ferrocytochrome c.

Product Info

Amount :	20 µg
Purification :	Greater than 95% as determined by SDS-PAGE.
Content :	The IdhA solution (1mg/ml) contains 20mM Tris-HCl buffer, pH8.0, 10% glycerol and 100mM NaCl.
Storage condition :	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
