32-2902: UBE2V2 Recombinant Protein

Alternative Name : DDVit-1,DDViT1,EDAF-1,EDPF-1,EDPF1,MMS2,UEV-2,UEV2,Ubiquitin-conjugating enzyme E2 variant 2,Enterocyte differentiation-associated factor 1,Enterocyte differentiation-promoting factor 1,Vitamin D3-1, and of the control of the contr

inducible protein, UBE2V2.

Description

Source: Escherichia Coli. UBE2V2 Recombinant Human produced in E.Coli is a single, non-glycosylated polypeptide chain containing 165 amino acids (1-145 a.a.) and having a molecular mass of 18.5 kDa. The UBE2V2 is fused to 20 amino acid His-Tag at N-terminus and purified by proprietary chromatographic techniques. UBE2V2 comprises a distinct subfamily within the E2 protein family. They have sequence similarity to other ubiquitin-conjugating enzymes however require the conserved cysteine residue that is vital for the catalytic activity of E2s. UBE2V2 shares homology with ubiquitin-conjugating enzyme E2 variant 1 and yeast MMS2 gene product. UBE2V2 participates in the differentiation of monocytes and enterocytes.

Product Info

Amount: 20 μg

Purification: Greater than 95.0% as determined by SDS-PAGE.

Content: UBE2V2 Human solution containing 20mM Tris pH-8, 0.1M NaCl & 10% glycerol.

Storage condition: UBE2V2 Human although stable at 4°C for 1 week, should be stored desiccated below -18°C.

Please prevent freeze thaw cycles.

Amino Acid: MGSSHHHHHH SSGLVPRGSH MAVSTGVKVP RNFRLLEELE EGQKGVGDGT VSWGLEDDED
