**Alternative Name** : C6orf115, Costars, HSPC280, PRO2013, RP11-501K14.2, Costars family protein ABRACL, ABRA C-terminal-like protein.

### Description

Source : Escherichia Coli. ABRACL Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 104 amino acids (1-81 a.a) and having a molecular mass of 11.4kDa. ABRACL is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. ABRACL is a member of the costars family, ABRACL belongs to a new family of low molecular weight proteins, which is presented only in eukaryotes, and is absent in fungi. ABRA C-terminal like is a protein-coding gene.
