32-3233: ARL11 Recombinant Protein

Alternative Name: ADP-ribosylation factor-like protein 11,ADP-ribosylation factor-like tumor suppressor protein 1,ARL11,ARL151.

Description

Source: Escherichia Coli. ARL11 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 216 amino acids (1-196 a.a.) and having a molecular mass of 23.6kDa,ARL11 is fused to a 20 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. ARL11 (ADP-ribosylation factor-like protein 11) belongs to the ARF family of the Ras superfamily of small GTPases which are known to be involved in multiple regulatory pathways altered in human carcinogenesis. ARFs are highly conserved guanine nucleotide binding proteins which enhance the ADPribosyltransferase activity of choleratoxin. ARFs are important in eukaryotic vesicular trafficking pathways and they have a vital role in the activation of phospholipase D (PC-PLD). ARL11 is assumed to act as a tumor suppressor which may have a role in the regulation of apoptosis.

Product Info

Amount: 20 μg

Greater than 90.0% as determined by SDS-PAGE. **Purification:**

ARL11 protein solution (0.5mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 5mM DTT,30% Content:

glycerol, 100mM NaCl and 1mM EDTA.

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods Storage condition:

of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or

BSA). Avoid multiple freeze-thaw cycles.
