

32-3459: CD247 Recombinant Protein

Alternative Name : T-cell surface glycoprotein CD3 zeta chain,T-cell receptor T3 zeta chain,CD247,CD3Z,T3Z,TCRZ,CD3H,CD3Q,CD3-ZETA.

Description

Source : E.coli. CD247 Human Recombinant produced in E. coli is a single polypeptide chain containing 136 amino acids (52-164) and having a molecular mass of 15.4kDa.CD247 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. T-cell surface glycoprotein CD3 zeta chain (CD247) is a member of the CD3Z/FCER1G family. CD247 is T-cell receptor zeta, which along with T-cell receptor alpha/beta and gamma/delta heterodimers, and also with CD3-gamma, -delta and -epsilon, creates the T-cell receptor-CD3 complex. The zeta chain has a central role in coupling antigen recognition to several intracellular signal-transduction pathways. Low expression of the CD247 antigen causes impaired immune response.
