

32-4056: Recombinant Human Kruppel-Like Factor 6

Alternative Name : Krueppel-like factor 6,B-cell-derived protein 1,Core promoter element-binding protein,GC-rich sites-binding factor GBF,Proto-oncogene BCD1,Suppressor of tumorigenicity 12 protein,Transcription factor Zf9,KLF6,BCD1,COPEB,CPBP,ST12.

Description

Source : Escherichia Coli. KLF6 Human Recombinant produced in E. coli is. a single polypeptide chain containing 306 amino acids (1-283) and having a molecular mass of 34.3kDa. KLF6 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Kruppel-Like Factor 6 (KLF6) is a nuclear protein which has 3 zinc fingers. The zinc fingers of KLF6 are accountable for the specific DNA binding with the guanine-rich core promoter factors. The central region is involved in activation or posttranslational regulatory pathways, and the acidic N terminal domain takes part in the process of transcriptional activation.

Product Info

Amount : 10 µg
Purification : Greater than 85% as determined by SDS-PAGE.
Content : The KLF6 solution (1mg/ml) contains 20mM Tris-HCl buffer (pH8.0), 10% glycerol and 1mM DTT.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
