

## 32-4205: Recombinant Human Microfibrillar-associated Protein 3

**Alternative Name :** Microfibril-associated glycoprotein 3, MFAP3.

### Description

Source : Escherichia Coli. MFAP3 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 152 amino acids (19-147) and having a molecular mass of 16.7 kDa. MFAP3 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Microfibrillar-associated Protein 3 (MFAP3) contains 1 Ig-like C2-type (immunoglobulin-like) domain, and belongs to IncRNA RNA class. The MFAP3 protein is a component of the elastin-associated microfibrils. Among MFAP3 related pathways are degradation of the extracellular matrix and elastic fiber formation. An significant paralog of the MFAP3 gene is MFAP3L.
