

## 32-4213: Recombinant Human Melan-A

**Alternative Name :** MART-1,MART1,Melanoma antigen recognized by T-cells 1,Antigen LB39-AA,Antigen SK29-AA,Protein Melan-A,MLANA.

### Description

Source : Escherichia Coli. MLANA Human Recombinant produced in E. coli is a single polypeptide chain containing 94 amino acids (48-118) and having a molecular mass of 10.4kDa. MLANA is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Melan-A (MLANA), is engaged in melanosome biogenesis by ensuring the stability of GPR143. MLANA takes part in the expression, stability, trafficking, and processing of melanocyte protein PMEL, which is essential to the formation of stage II melanosomes.
