

32-4367: Recombinant Human OCIA Domain Containing 2

Alternative Name : OCIA domain-containing protein 2,Ovarian carcinoma immunoreactive antigen-like protein,OCIAD2.

Description

Source : Escherichia Coli. OCIAD2 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 177 amino acids (1-154 a.a) and having a molecular mass of 19.3kDa.OCIAD2 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. OCIA domain-containing protein 2 (OCIAD2) is a protein-coding gene which localizes to endosomes and contains one Ovarian carcinoma immunoreactive antigen (OCIA) domain. Among the associated diseases with OCIAD2 are bronchiolo-alveolar adenocarcinoma, and ovarian mucinous neoplasm. OCIAD1 is an important paralog of this gene.
