

32-4414: Recombinant Human PDGFA Associated Protein 1

Alternative Name : PAP1,HASPP28.

Description

Source : Escherichia Coli. PDAP1 Recombinant Human produced in E.Coli is a single, non-glycosylated polypeptide chain containing 189 amino acids (1-181 a.a.) and having a molecular mass of 21.7 kDa. The PDAP1 is fused to an 8 amino acid His-Tag at C-terminus and purified by proprietary chromatographic techniques. PDAP1, increases PDGFA-stimulated cell growth in fibroblasts, however inhibits the mitogenic effect of PDGFB. PDAP1 expression is induced by TNF-alpha, and cells overexpressing PDAP1 show significantly less apoptosis on exposure to TNF-alpha.
