

32-4463: Recombinant Human PBX/Knotted 1 Homeobox 1

Alternative Name : pknox1c,PREP1,Homeobox protein PKNOX1,Homeobox protein PREP-1,PBX/knotted homeobox 1,PKNOX1.

Description

Source : Escherichia Coli. PKNOX1 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 456 amino acids (1-436 a.a) and having a molecular mass of 49.7kDa. PKNOX1 is fused to a 20 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. PBX/Knotted 1 Homeobox 1 (PKNOX1) is a DNA-binding factor which takes part in the regulation of the transcriptional activity of AP-1 containing promoters. PKNOX1, which is also known as UEF3, PRP-1 and p64, is a Homeobox protein. PKNOX1 forms stable complexes containing PBX proteins which synergize with AP-1 binding factors in order to amplify transcription of the urokinase gene.

Product Info

Amount : 5 µg
Purification : Greater than 80.0% as determined by SDS-PAGE.
Content : PKNOX1 protein solution (0.25mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 0.1M NaCl and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
