

32-4669: Recombinant Human Ring Finger Protein 34

Alternative Name : Ring Finger Protein 34, E3 Ubiquitin Protein Ligase, RING Finger Protein 34, Caspase Regulator CARP1, Caspases-8 And -10-Associated RING Finger Protein 1, FYVE-RING Finger Protein Momo, Human RING Finger Homologous To Inhibitor Of Apoptosis Protein,

Description

Source : Escherichia Coli. RNF34 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 396 amino acids (1-373a.a) and having a molecular mass of 44.2kDa. RNF34 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Ring Finger Protein 34 (RNF34) has E3 ubiquitin-protein ligase activity. RNF34 has a RING finger, a motif recognized to be involved in protein-protein and protein-DNA interactions. RNF34 regulates the levels of CASP8 and CASP10 by targeting them for proteasomal degradation. In addition, RNF34 protects cells against apoptosis induced by TNF. RNF34 also binds phosphatidylinositol 5-phosphate and phosphatidylinositol 3-phosphate. Alternatively splicing results in multiple transcript variants encoding distinct isoforms.

Product Info

Amount : 20 µg
Purification : "Greater than 90.0% as determined by SDS-PAGE."
Content : RNF34 protein solution (1mg/ml) containing 20mM Tris-HCl buffer (pH8.0), 10% glycerol, 0.1M NaCl and 1mM DTT.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please avoid freeze thaw cycles.
