

32-4987: Recombinant Human STE20-Related Kinase Adaptor Alpha

Alternative Name : LYK5,NY-BR-96,PMSE,Stlk,STRAD,STE20-related kinase adapter protein alpha,STRAD alpha,STE20-related adapter protein,Serologically defined breast cancer antigen NY-BR-96,STRADA.

Description

Source : Escherichia Coli. STRADA Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 337 amino acids (1-314a.a) and having a molecular mass of 37kDa. STRADA is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. STE20-Related Kinase Adaptor Alpha (STRADA) is a part of the STE- 20 like kinase family which stimulates MAPK pathways by activating MAPKKK. STRADA is an upstream activator of LKB1 and also leads the sub-cellular localization of LKB1 by fixing it in the cytoplasm. The interaction between STRADA-LKB1 leads to phosphorylation of STRADA and enhanced autophosphorylation of LKB1.

Product Info

Amount : 25 µg
Purification : Greater than 85.0% as determined by SDS-PAGE.
Content : STRADA protein solution (1mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 0.4M Urea and 10% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
