

32-5015: Recombinant Human SYF2 RNA splicing factor

Alternative Name : Pre-mRNA-splicing factor SYF2,CCNDBP1-interactor,p29,SYF2,CBPIN,GCIPIP,NTC31,fSAP29.

Description

Source : Escherichia Coli. SYF2 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 173 amino acids (94-243) and having a molecular mass of 20.5kDa.SYF2 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Pre-mRNA-splicing factor SYF2 (SYF2) may be involved in pre-mRNA splicing. The SYF2 protein interacts with cyclin D-type binding-protein 1, which is believed to be a cell cycle regulator at the G1/S transition. SYF2 is amply expressed in the heart, skeletal muscle and kidney and is expressed at lower levels in other tissues.
