

32-5036: Recombinant Human Tax1 Binding Protein 3

Alternative Name : Tax1 (human T-cell leukemia virus type I) binding protein 3,TIP-1,Glutaminase-interacting protein 3,Tax interaction protein 1.

Description

Source : E.coli. TAX1BP3 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 144 amino acids (1-124 a.a.) and having a molecular mass of 15.8kDa.TAX1BP3 is fused to a 20 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. TAX1BP3 holds one PDZ domain, which uses for interactions with other proteins like the interaction with the C-terminus of Rhotekin that facilitates Rho-mediated activation of the FOS serum response element. In addition, PDZ domain interacts with beta-catenin to inhibit the transcriptional activity of beta-catenin. TAX1BP3 exists in several cell lines, such as HeLa, and is expressed in small quantities in peripheral blood leukocytes.

Product Info

Amount : 25 µg
Purification : Greater than 95% as determined by SDS-PAGE.
Content : TAX1BP3 protein solution (1mg/ml) containing 20mM Tris-HCl buffer (pH8.0), 1mM DTT, 0.1M NaCl and 20% glycerol.
Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
