

## 32-5106: Recombinant Human Tumor Protein P53 Regulated Apoptosis Inducing Protein 1

**Alternative Name** p53-regulated apoptosis-inducing protein 1,Tumor Protein P53 Regulated Apoptosis Inducing Protein 1,TP53AIP1,p53AIP1,P53-regulated apoptosis-inducing protein 1 isoform a,TPIP1,P53AIP1.

### Description

Source : Escherichia Coli. TP53AIP1 Human Recombinant produced in E.coli is a single, non-glycosylated polypeptide chain containing 144 amino acids (1-124) and having a molecular mass of 15kDa.TP53AIP1 is fused to a 20 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. Tumor Protein P53 Regulated Apoptosis Inducing Protein 1 (TP53AIP1) is expressed mainly in the thymus, and is localized to the mitochondrion. p53 induces TP53AIP1 production which then mediates p53- dependent apoptosis. Alternatively spliced transcript variants encoding diverse isoforms are known for TP53AIP1.
