

## 32-5187: Recombinant Human UFM1-Specific Peptidase 1

**Alternative Name :** Inactive Ufm1-specific protease 1,UFSP1,UFSP.

### Description

Source : Escherichia Coli. UFSP1 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 165 amino acids (1-142 a.a.) and having a molecular mass of 17kDa.UFSP1 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques. UFM1-Specific Peptidase 1 (UFSP1) is similar to other Ufm1-specific proteases. Studies in mice determined that Ufsp1 releases ubiquitin-fold modifier 1 (Ufm1) from its bound conjugated complexes which also makes it into an active form. Since the human UFSP1 protein is shorter on the N-terminus and lacks a conserved Cys active site, it is expected to be non-functional.

### Product Info

<b>Amount :</b>	10 µg
<b>Purification :</b>	Greater than 90.0% as determined by SDS-PAGE.
<b>Content :</b>	UFSP1 protein solution (0.25mg/ml) containing 20mM Tris-HCl buffer (pH 8.5), 0.2M NaCl, 30% glycerol and 1mM DTT.
<b>Storage condition :</b>	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
<b>Amino Acid :</b>	MGSSHHHHHH SSSLVPRGSH MGSMGDKPPG FRGSRDWIGC VEASLCLAHF GGPQGR LCHV PRGVGLHGEL ERLYSHFAGG GGPVMVGGDA DARSKALLGV CVGSGTEAYV LVLDPHYWGT PKSPSELQAA GWVGWQEVSA AFDPN SFYNL CLTSLSSQQQ QRTLD.
