

32-5519: Recombinant Hepatitis B Surface Antigen Adw subtype

Description

Source : Pichia Pastoris. HbsAg adw produced Pichia Pastoris, having a molecular weight of approximately 24.0 kDa as shown on SDS-PAGE. HBsAg is the surface antigen of the Hepatitis-B-Virus (HBV). The capsid of a virus has different surface proteins from the rest of the virus. The antigen is a protein that binds specifically on one of these surface proteins. It is commonly referred to as the Australian Antigen.

Product Info

| | |
|----------------------------|--|
| Amount : | 100 µg |
| Purification : | Greater than 95.0% as determined by SDS-PAGE Coomassie staining. |
| Content : | Sterile Filtered solution containing 20mM Phosphate Buffer, 154mM sodium chloride. |
| Storage condition : | HBsAg Should be stored at 4°C.DO NOT FREEZE. |
