

**32-5523: Recombinant Hepatitis B Surface Antigen adw subtype, Mutant K-133-L  
(Discontinued)****Description**

Source : Pichia pastoris. Recombinant HBsAg adw antigen was mutated by replacing the Methionine residue at position 133 with Leucine. HBsAg is the surface antigen of the Hepatitis-B-Virus (HBV). The capsid of a virus has different surface proteins from the rest of the virus. The antigen is a protein that binds specifically on one of these surface proteins. It is commonly referred to as the Australian Antigen.

**Product Info**

<b>Amount :</b>	50 µg
<b>Purification :</b>	Greater than 85.0% as determined by SDS-PAGE Coomassie staining.
<b>Content :</b>	Sterile Filtered solution containing 20mM Na <sub>2</sub> HPO <sub>4</sub> , 0.03M NaCl and 0.001% Thimerosal, pH-7.4.
<b>Storage condition :</b>	HBsAg Should be stored at 4°C.
