

## 32-5528: Recombinant Hepatitis B Surface Antigen adw subtype, Mutant T-126-N (Discontinued)

### Description

Source : Pichia pastoris. Recombinant HBsAg adw antigen was mutated by replacing the Threonine residue at position 126 with Asparagine. HBsAg is the surface antigen of the Hepatitis-B-Virus (HBV). The capsid of a virus has different surface proteins from the rest of the virus. The antigen is a protein that binds specifically on one of these surface proteins. It is commonly referred to as the Australian Antigen.

### Product Info

<b>Amount :</b>	50 µg
<b>Purification :</b>	Greater than 85.0% as determined by SDS-PAGE Coomassie staining.
<b>Content :</b>	Sterile Filtered solution containing 20mM Na <sub>2</sub> HPO <sub>4</sub> , 0.03M NaCl and 0.001% Thimerosal, pH-7.4.
<b>Storage condition :</b>	HBsAg Should be stored at 4°C.
