

36-1413: Monoclonal Antibody to MAGE-1 (Target for Cancer Immunotherapy)(Clone : SPM282)

Clonality :	Monoclonal
Clone Name :	SPM282
Application :	FACS,IF,IHC
Reactivity :	Human, Rat
Gene :	MAGEA1
Gene ID :	4100
Uniprot ID :	P43355
Format :	Purified
Alternative Name :	MAGEA1,MAGE1,MAGE1A
Isotype :	Mouse IgG1, kappa
Immunogen Information : Human MAGE-A1 full length recombinant protein	

Description

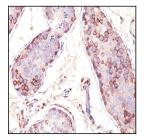

Recognizes a protein of 42-46kDa, identified as MAGE-1. This MAb does not cross-react with MAGE-2, -3, -4, -6 -9, -10, -or -12 protein. Human malignant neoplasms carry rejection antigens that are recognized by the patients' autologous, tumor directed and specific, cytolytic, CD8+ T lymphocyte clones (CTL). The MAGE family of genes codes an important group of antigens. It was identified that melanomas and primary glial brain tumors express common melanoma associated antigens (MAAs). Because MAGE-1 is expressed on a significant proportion of human neoplasms of various histological types (melanoma, brain tumors of glial origin, neuroblastoma, non-small cell lung cancer, breast, gastric, colorectal, ovarian, renal cell carcinomas) and not on normal tissues, the encoded antigen may serve as a marker of early detection and target for cancer immunotherapy.

Product Info

Amount : Purification :	100 μg Affinity Chromatography
Content :	100 μg in 500 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly toxic.
Storage condition :	Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid repeated freeze and thaw cycles.

Application Note

Flow Cytometry (1-2ug/million cells); Immunofluorescence (1-2ug/ml); Immunohistochemistry (Formalin-fixed) (1-2ug/ml for 30 minutes at RT)(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes);

Formalin-fixed, paraffin-embedded human Testis stained with MAGE-1 Monoclonal Antibody (SPM282).

For Research Use Only. Not for use in diagnostic/therapeutics procedures.
