35-1201: Polyclonal Antibody to FAK (Phospho-Tyr397)

Clonality: Polyclonal

Application: WB

Reactivity: Human, Mouse, Rat

Gene : PTK2
Gene ID : 5747
Uniprot ID : Q05397
Format : Purified

Alternative Name: FAK, FAK1, PTK2 Isotype: Rabbit IgG

Immunogen Information: Peptide sequence around phosphorylation site of tyrosine 397(D-D-Y(p)-A-E)derived from

Human FAK.

Description

Non-receptor protein-tyrosine kinase implicated in signaling pathways involved in cell motility, proliferation and apoptosis. Activated by tyrosine-phosphorylation in response to either integrin clustering induced by cell adhesion or antibody cross-linking, or via G-protein coupled receptor (GPCR) occupancy by ligands such as bombesin or lysophosphatidic acid, or via LDL receptor occupancy. Microtubule-induced dephosphorylation at Tyr-397 is crucial for the induction of focal adhesion disassembly. Plays a potential role in oncogenic transformations resulting in increased kinase activity.

Product Info

Amount : 50 μl / 100 μl

Content: Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM

NaCl, 0.02% sodium azide and 50% glycerol.

Storage condition : Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

Predicted MW: 125kd, Western blotting: 1:500~1:1000
