12-1038: Recombinant Rabbit Monoclonal Antibody to S100A1 (Astrocyte Marker)(Clone : S100A1/1706R)(Discontinued)

Clonality: Monoclonal
Clone Name: S100A1/1706R
Application: IHC,FACS,WB,IF
Reactivity: Discontinued
Gene: S100A1
Gene ID: 6271
Uniprot ID: P23297

Alternative Name:

Bpb, NEF, S100-A1, S100 Alpha Chain, S100 Beta Chain, S100 Calcium Binding Protein A1,

S100 Calcium Binding Protein B, S100 Calcium Binding Protein Beta Neural

Isotype: Rabbit IgG, kappa

Immunogen Information: Recombinant full-length human S100A1 protein

Purified

Description

Format:

The family of EF-hand type Ca2+-binding proteins includes calbindin, S-100 alpha and beta, calgranulins, B and C, and the parvalbumin family members, including parvalbumin alpha and parvalbumin beta. The S-100 protein is involved in the regulation of cellular processes such as cell cycle progression and differentiation. S-100 protein may function in the activation of Ca2+ induced Ca2+ release, inhibition of microtubule assembly and inhibition of protein kinase C mediated phosphorylation. Two S-100 subunits, sharing 60% sequence identity, have been described as S-100 alpha chain and S-100 beta chain. Three S-100 dimeric forms have been characterized, differing in their subunit composition of two alpha chains, two beta chains or one alpha and one beta chain. S-100 localizes to the cytoplasm and nuclei of astrocytes, Schwann s cells, ependymomas and astrogliomas. S-100 is also detected in almost all benign naevi, malignant melanocytic tumours and in Langerhans cells in the skin. Calbindin, S-100 proteins and parvalbumin proteins are each expressed in neural tissues. In addition, S-100 alpha and beta are present in a variety of other tissues and calbindin is present in intestine and kidney.

Product Info

Amount : 20 μg / 100 μg

Purification: Purified Ab with BSA and Azide at 200ug/ml

Content: 200ug/ml of Ab purified by Protein A. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide.

Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage condition:

Storage condition:

Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

MW: 10-12kDa; Positive Control: Brain, Melanoma; Flow Cytometry (0.5-1ug/million cells); Immunofluorescence (1-2ug/ml); Western Blotting (0.5-1ug/ml), Immunohistology (Formalin-fixed) (0.25-0.5ug/ml for 30 minutes at RT), (Staining of formalin-fixed tissues requires boiling tissue sections in 10mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes), Optimal dilution for a specific application should be determined.
