34-1013: Monoclonal Antibody to Aurora A/B Kinase (Clone: 3H1)

Clonality: Monoclonal

Clone Name: 3H1

Application : WB, IF/ICC, IHC **Reactivity :** Human, Rat, Mouse

Format: Purified Isotype: Mouse, IgG1

Immunogen Information: Full length recombinant human Aurora A protein expressed in and purified from E. coli.

Product Info

Amount : 50 μl / 100 μl

Content: Antibody is supplied as an aliquot of 1 mg/ml of affinity purified antibody.

Storage condition : Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

WB: 1:1,000. IF/ICC or IHC: 1:500-1:1,000.

Figure-1: Immunofluorescent analysis of HeLa cell culture stained with mouse mAb to aurora A/B kinase,(34-1013), in green, and costained with chicken pAb to vimentin,(34-1126), in red. The blue is DAPI staining of nuclear DNA. The (34-1014) antibody stains spindle poles and mitotic spindles at anaphase and concentrates on the midbody between the two daughter cells during telophase.

Figure-2: Western blot analysis of different cell lysates and recombinant protein solutions using mouse mAb to Aurora A/B,(34-1013). Left: cells were treated with 100 ng/mL of nicodazol for 6 hours:[1] protein standard, [2] HeLa, [3] A72, [4] NBL6, and [5] KR158 cells. Right: human recombinant protein Aurora (A, B, C as indicated) solutions. Bands at 46kDa and 38kDa correspond to Aurora A and Aurora B proteins respectively.
