Figure 2: ELISA of human immunoglobulins shows Clone: RM127 reacts to the Lambda light chain of human immuno-globulins. No cross reactivity with the Kappa light chain, mouse IgG, rat IgG, or goat IgG. The plate was coated with 50 ng/well of different immuno-globulins. 200 ng/mL or 50 ng/mL of Clone: RM127 was used as the primary antibody. An alkaline phos-phatase conjugated anti-rabbit IgG as the secondary antibody.

Figure 3: A titer ELISA using Clone: RM127. The plate was coated with different amounts of human IgG3 Lambda . A serial dilution of Clone: RM127 was used as the primary antibody. An alkaline phosphatase conjugated anti-rabbit IgG as the secondary antibody.
