## 10-3503: Monoclonal Antibody to mouse MD-1 (Clone: MD113)(Discontinued)

Clonality: Monoclonal Clone Name: MD113 **Application:** FACS Reactivity: Mouse Gene: Ly86 Gene ID: 17084 Uniprot ID: 088188 **Purified** Format: Isotype: Rat IgG2b

## **Description**

The monoclonal antibody 10-3503 reacts with mouse MD-1. MD-1 (22-25 kD) is an extracellular protein associated with the extracellular domain of RP105. The latter is a type 1 transmembrane protein with leucine-rich repeats. RP105 is similar to Drosophila Toll. MD-1 associated with RP105 (similar to TLR4/MD-2) appears to be an essential molecule that helps RP105 on B-cells to signal to LPS. The MD113 antibody is antagonistic in LPS-induced B-cell proliferation and B7.2 up-regulation.

## **Product Info**

**Amount:** 1 (Clone: MD113)(Discontinued) / 500 μg

Content: 0.5 mg, 0.2 µm filtered antibody solution in PBS, containing 0.1% bovine serum albumin and

0.02% sodium azide.

**Storage condition :** Product should be stored at 4 °C. Under recommended storage conditions, product is stable for

one year.

## **Application Note**

The monoclonal antibody MD113 can be used for flow cytometry and functional studies. The monoclonal antibody cannot be used for Western blot and immunoprecipitation.

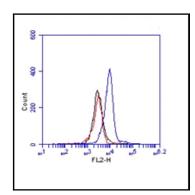

Figure-1: Flow analysis of mouse MD-1 antibody (Clone: MD113): Cell surface staining of Raw cells, blue represents mouse MD-1, red represents Isotope control Rat IgG2b. 1:50 dilution of antibody was used. Goat Anti-Rat PE was used as secondary antibody.
