

## 10-3509: Monoclonal Antibody to Human/Mouse TLR2 (Clone : mT2.4)(Discontinued)

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	mT2.4
<b>Application :</b>	Functional Assay,IHC,FACS
<b>Reactivity :</b>	Mouse
<b>Gene :</b>	Tlr2
<b>Gene ID :</b>	24088
<b>Uniprot ID :</b>	Q9QUN7
<b>Format :</b>	Purified
<b>Isotype :</b>	Mouse IgG2b

### Description

Monoclonal antibody 10-3509 reacts with mouse Toll-like receptor 2 (TLR2, CD282). Toll-like receptors (TLR) are highly conserved throughout evolution and have been implicated in the innate defense to many pathogens. In *Drosophila* toll is required for the anti-fungal response, while the related 18-wheeler is involved in antibacterial defenses. In mammals, TLR identified as type I transmembrane signaling receptors with pattern recognition capabilities, have been implicated in the innate host defense to pathogens. TLR2 has been identified as a receptor that is central to the innate immune response to lipoproteins of Gram-negative bacteria, several whole Gram-positive bacteria, as well as a receptor for peptidoglycan and lipoteichoic acid and other bacterial cell membrane products. A functional interaction between TLR2 and TLR6 in the cellular response to various bacterial products has been discovered. The currently accepted paradigm regards TLR2 as an essential receptor for many eubacterial cell wall components, including lipoproteins and peptidoglycan. Bacterial species as diverse as mycobacteria, spirochetes, mycoplasma, *Staphylococcus aureus*, and *Streptococcus pneumoniae* have all been shown to mediate cellular activation via TLR2. The monoclonal antibody mT2.4 inhibits murine TLR2-mediated cell activation. It masks the lipopeptide binding site in the recombinant extracellular domain of TLR2 (TLR2ECD) and does not hinder the receptor complex formation. The antibody reacts with the native TLR2 protein and not with denatured TLR2 protein. Furthermore the antibody stains overexpressed, as well as endogenous cell surface- and intracellular mouse TLR2.

### Product Info

<b>Amount :</b>	Monoclonal Antibody to Human/Mouse TLR2 (Clone : mT2.4)(Discontinued) / 500 µg
<b>Content :</b>	0.5 mg, 0.2 µm filtered antibody solution in PBS, containing 0.1% bovine serum albumin.
<b>Storage condition :</b>	Product should be stored at 4 °C. Under recommended storage conditions, product is stable for one year.

### Application Note

For immunohistology and flow cytometry dilutions to be used depend on detection system applied. It is recommended that users test the reagent and determine their own optimal dilutions. The typical starting working dilution is 1:50. For neutralization of biological activity in vitro dilutions have to be made according to the amounts of TLR2 (CD282) to be inactivated.

Fig. 1:Flow analysis of human/mouse TLR2 antibody (Clone:mT2.4): Cell surface staining of Raw cells, blue represents mouse TLR2, red represents Isotope control mouse IgG2b. 1:50 dilution of antibody was used. Goat Anti-mouse PE was used as secondary antibody.
