

10-12545: Mouse Monoclonal Antibody to MBP(Clone :BS188) (Discontinued)

Clonality :	Monoclonal
Clone Name :	BS188
Application :	IHC
Reactivity :	Human
Gene :	MBP
Gene ID :	4155
Uniprot ID :	P02686
Alternative Name :	Myelin A1 protein, Myelin membrane encephalitogenic protein
Isotype :	Mouse IgG1

Description

The protein encoded by the classic MBP gene is a major constituent of the myelin sheath of oligodendrocytes and Schwann cells in the nervous system. However, MBP-related transcripts are also present in the bone marrow and the immune system. These mRNAs arise from the long MBP gene (otherwise called "Golli-MBP") that contains 3 additional exons located upstream of the classic MBP exons. Alternative splicing from the Golli and the MBP transcription start sites gives rise to 2 sets of MBP-related transcripts and gene products. The Golli mRNAs contain 3 exons unique to Golli-MBP, spliced in-frame to 1 or more MBP exons. They encode hybrid proteins that have N-terminal Golli aa sequence linked to MBP aa sequence. The second family of transcripts contain only MBP exons and produce the well characterized myelin basic proteins. This complex gene structure is conserved among species suggesting that the MBP transcription unit is an integral part of the Golli transcription unit and that this arrangement is important for the function and/or regulation of these genes.

Product Info

Amount :	0.1 ml / 0.5 ml
Content :	TRIS with 0.03% sodium azide, pH7.2
Storage condition :	Store at 4°C

Application Note

Immunohistochemical Analysis :-1:200

Figure-1: Human cerebellum has been stained using MBP antibody (Clone: BS188).

Figure-2: Human cerebellum has been stained using MBP antibody (Clone: BS188).

Figure-3: Human brain tissue has been stained using MBP antibody (Clone: BS188).

Figure-4: Rat spinal cord tissue has been stained using MBP antibody (Clone: BS188).

Figure-5: Rat cerebellum has been stained using MBP antibody (Clone: BS188).
