39-1055: Anti-alpha-Adaptin Monoclonal Antibody (Clone: 100/2)

Clonality: Monoclonal Clone Name: 100/2 WB Application: Reactivity: Human Gene: Ap2a1 Gene ID: 308578 **Uniprot ID:** D37UY8

Adaptor protein complex AP-2, alpha 1 subunit (Predicted); Protein Ap2a1; Ap2a1; **Alternative Name:**

Ap2a1 predicted; rCG 54084

Isotype: Mouse IgG2a

Immunogen Information: AP-2 adaptor polypeptides from bovine brain.

Description

Alpha Adaptin, also known as adaptor related protein complex, alpha 1 subunit. The alpha adaptins are exclusively found in the endocytic coated vesicles. Huntingtin-interacting protein 1(HIP1) is enriched in membrane-containing cell fractions and has been implicated in vesicle trafficking. Waelter et al.(2001) identified 3 HIP1-associated proteins, clathrin heavy chain(CLTC)and alpha-adaptin A and C. Coat proteins of approximately 100-kD(adaptins) are components of the adaptor complexes which link clathrin to receptors in coated vesicles. The alpha-adaptins separate into two bands on SDS gels.

Product Info

Amount: 100 μg/vial **Purification: Ascites**

Mouse ascites fluid, 1.2% sodium acetate, 2mg BSA, with 0.01mg NaN3 as preservative. Content:

Reconstitute: Add 1ml of PBS buffer will yield a concentration of 100ug/ml.

At -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and Storage condition:

stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Application Note

Western blot : 2-4̸¼g/ml
