43-1018: Monoclonal Antibody to Mouse/Rat CD61 (Integrin beta 3) NALE™ Purified (Clone: 2C9.G3)

Clonality: Monoclonal
Clone Name: 2C9.G3
Application: FACS
Reactivity: Mouse
Gene: ltgb3
Gene ID: 16416
Uniprot ID: 054890

Alternative Name: Platelet membrane glycoprotein IIIa, GP3A, Integrin beta-3

Isotype: Armenian Hamster IgG

Description

The 2C9.G3 monoclonal antibody specifically reacts with the mouse/rat CD61 molecule, known as the integrin beta 3 that forms the vitronectin receptor with CD51. The complex binds to other ligands such as fibrinogen, fibronectin, thrombospondin, and von Willebrand factor. It is expressed by granulocytes, platelets, activated T cells, smooth muscle, and a subset of B cells.

Product Info

Amount: $100 \mu g$

Content: 1 mg/ml in Phosphate-buffered aqueous solution, ph7.2.

The product should be stored undiluted at 4°C. Do not freeze. The monoclonal antibody was

Storage condition: purified utilizing affinity chromatography. The endotoxin level is determined by LAL test to be

less than 0.01 EU/ μg of the protein.

Application Note

The antibody has been analyzed for quality through the flow cytometric analysis of the relevant cell type. It is recommended that the reagent be titrated for optimal performance for each application.
