

32-7269: Recombinant Human Peptidyl-Prolyl Cis-Trans Isomerase-Like 1/PPIase/PPIL1(N-6His)

Gene : PPIL1
Gene ID : 51645
Uniprot ID : Q9Y3C6

Description

Source: E.coli.
MW :20.4kD.

Recombinant Human PPIase is produced by our E.coli expression system and the target gene encoding Met1-Gly166 is expressed with a 6His tag at the N-terminus. Peptidyl-Prolyl Cis-Trans Isomerase-Like 1 (PPIase) belongs to the cyclophilin-type PPIase family. PPIases can accelerate the folding of proteins and catalyze the cis-trans isomerization of proline imidic peptide bonds in oligopeptides. PPIase is a ubiquitous protein and has highly expression in heart ,skeletal and muscle. PPIase contains a PPIase cyclophilin-type domain and four Cyclosporin A binding regions. PPIase might play an important role in proliferation of cancer cells through modulation of phosphorylation of stathmin. It is suggested that PPIase can act as as a novel molecular target for colon-cancer therapy.

Product Info

Amount : 10 µg / 50 µg
Content : Supplied as a 0.2 µm filtered solution of 20mM TrisHCl, pH 8.0.
Storage condition : Store at -20°C, stable for 6 months after receipt. Please minimize freeze-thaw cycles.
Amino Acid : MGSSHHHHHHSSGLVPRGSHMAAIPPSWQPPNVYLETSMGIIVLELYWKHAPKTCKNFAELARRGYNGTKF
HRIIKDFMIQGGDPTGTGRGGASIYGKQFEDELHPDLKFTGAGILAMANAGPDTNGSQFFVTLAPTQWLDGKH
TIFGRVCQGIGMVNRVGMVETNSQDRPVDDVKIKAYPSG

Application Note

Endotoxin : Less than 0.1 ng/Åµg (1 IEU/Åµg) as determined by LAL test.
