

32-7315: Recombinant Human Protein FAM3C (C-6His)(Discontinued)

Gene : FAM3C
Gene ID : 10447
Uniprot ID : Q92520

Description

Source: Human Cells.
MW :23.2kD.

Recombinant Human Protein FAM3C is produced by our Mammalian expression system and the target gene encoding Gln25-Asp227 is expressed with a 6His tag at the C-terminus. FAM3C, also called interleukin-like EMT inducer, usually exist in most secretory epithelia. It belongs to the FAM3 family according to their sequence similarities. The up-regulation and/or mislocalization in breast cancer and liver carcinoma cells of FAM3C is strongly correlated with metastasis formation and survival. FAM3C can be involved in retinal laminar formation and promote epithelial to mesenchymal transition.
