**Uniprot ID :** O95881

### Description

Source: Human Cells.

MW :16.98kD.

Recombinant Human TXNDC12 is produced by our Mammalian expression system and the target gene encoding His27-Leu168 is expressed with a 6His tag at the C-terminus. Thioredoxin Domain-Containing Protein 12 belongs to the thioredoxin superfamily. In this family, proteins possess a thioredoxin fold with a consensus active-site sequence (CxxC) and have roles in redox regulation, defense against oxidative stress, refolding of disulfide-containing proteins, and regulation of transcription factors. TXNDC12 is widely expressed in many tissues and contains one thioredoxin domain.
