

32-7619: Recombinant Human BOC Protein/BOC (C-6His)

Gene : BOC
Gene ID : 91653
Uniprot ID : Q96DN7

Description

Source: Human Cells.
MW :14.2kD.

Recombinant Human BOC is produced by our Mammalian expression system and the target gene encoding Asp31-Ser157 is expressed with a 6His tag at the C-terminus. Brother of CDO is a protein that in humans is encoded by the BOC gene. CDON and BOC are cell surface receptors of the immunoglobulin (Ig)/fibronectin type III repeat family involved in myogenic differentiation. CDON and BOC are coexpressed during development, form complexes with each other in a cis fashion, and are related to each other in their ectodomains, but each has a unique long cytoplasmic tail.
