

32-7760: Recombinant Human Ribonuclease Pancreatic/RNASE1 (C-6His)

Gene : RNASE1

Gene ID : 6035

Uniprot ID : P07998

Description

Source: Human Cells.

MW :15.6kD.

Recombinant Human Ribonuclease Pancreatic is produced by our Mammalian expression system and the target gene encoding Lys29-Thr156 is expressed with a 6His tag at the C-terminus. Ribonuclease Pancreatic is a secreted enzyme that belongs to the pancreatic ribonuclease family. RNASE1 is an endonuclease that cleaves internal phosphodiester RNA bonds on the 3'-side of pyrimidine bases. RNASE1 prefers poly(C) as a substrate and hydrolyzes 2',3'-cyclic nucleotides, with a pH optimum near 8.0. RNASE1 acts on single stranded and double stranded RNA.
