

32-8144: Recombinant Human PDCD10/TFAR15

Gene : PDCD10
Gene ID : 11235
Uniprot ID : Q9BUL8

Description

Source: E. coli.
MW :24.9kD.

Recombinant Human Programmed Cell Death Protein 10 is produced by our E.coli expression system and the target gene encoding Met1-Ala212 is expressed. Programmed Cell Death Protein 10 (PDCD10) belongs to the PDCD10 family. PDCD10 exists as a homodimer and is widely expressed. PDCD10 can increase mitogen-activated protein kinase activity and MST4 activity. PDCD10 is required for normal cardiovascular development and normal angiogenesis, vasculogenesis and hematopoiesis during embryonic development. Defects in PDCD10 are the cause of cerebral cavernous malformations type 3.
