

32-8218: Recombinant Human Leukocyte Surface Antigen CD47/IAP/OA3 (C-Fc)

Gene : CD47
Gene ID : 961
Uniprot ID : Q08722

Description

Source: Human Cells.
MW :40.8kD.

Recombinant Human CD47 is produced by our Mammalian expression system and the target gene encoding Gln19-Pro139 is expressed with a Fc tag at the C-terminus. CD47 is involved in the increase in intracellular calcium concentration that occurs upon cell adhesion to extracellular matrix. The protein is also a receptor for the C-terminal cell-binding domain of thrombospondin, and it may play a role in membrane transport and signal transduction. This protein has broad tissue distribution, and is reduced in expression on Rh erythrocytes.
