

32-8340: Recombinant Human Polyubiquitin-B/UBB (N-GST, 6His)

Gene : UBB
Gene ID : 7314
Uniprot ID : P0CG47

Description

Source: E. coli.
MW :40.9kD.

Recombinant Human Polyubiquitin-B is produced by our E.coli expression system and the target gene encoding Met153-Gly228 is expressed with a GST, 6His tag at the N-terminus. Polyubiquitin-B(UBB) is one of Ubiquitins. Ubiquitin is one of the most conserved proteins known in eukaryotic organisms. Ubiquitin is required for ATP-dependent, non-lysosomal intracellular protein degradation of abnormal proteins and normal proteins with a rapid turnover. Ubiquitin is covalently bound to proteins to be degraded, and presumably labels these proteins for degradation.

Product Info

Amount : 10 µg / 50 µg
Content : Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.
Storage condition : Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at -20°C for 3 months.
Amino Acid : MSPILGYWKIKGLVQPTRLLEYLEEKYEEHLYERDEGDKWRNKKFELGLEFPNLPYYIDGDVKLTQ

KQLEDGRTLSDYNIQKESTLHLVLRRLGG

Application Note

Endotoxin : Less than 0.1 ng/Åµg (1 IEU/Åµg) as determined by LAL test.
