

32-8356: Recombinant Human Protachykinin-1/TAC1 (N-6His)(Discontinued)

Gene : TAC1
Gene ID : 6863
Uniprot ID : P20366

Description

Source: E. coli.

MW :15.2kD.

Recombinant Human Protachykinin-1 is produced by our E.coli expression system and the target gene encoding Glu20-Arg129 is expressed with a 6His tag at the N-terminus. Protachykinin-1(TAC1) is a secreted protein and belongs to the tachykinin family. TAC1 is encoded by the TAC1 gene. This gene encodes four products of the tachykinin peptide hormone family, substance P and neurokinin A, as well as the related peptides, neuropeptide K and neuropeptide gamma. These hormones are thought to function as neurotransmitters which interact with nerve receptors and smooth muscle cells. They are known to induce behavioral responses and function as vasodilators and secretagogues.

Product Info

Amount : 10 µg / 50 µg
Content : Supplied as a 0.2 µm filtered solution of 20mM Tris,150mM NaCl,pH 8.0(10% glycerol 2M Urea).
Storage condition : Store at -20°C, stable for 6 months after receipt. Please minimize freeze-thaw cycles.
Amino Acid : MGSSHHHHHSSGLVPRGSHMEEIGANDDLNYWSDWYDSQIKEELPEPFEHLLQRIARRPKPQQFFGLMGK
RDADSSIEKQVALLKALYGHGQISHKRHKTD SFVGLMGKRALNSVAYERSAMQNYERRR

Application Note

Endotoxin : Less than 0.1 ng/Åµg (1 IEU/Åµg) as determined by LAL test.
