Gene : TXNDC15

Gene ID : 79770

Uniprot ID : Q96J42

Description

Source: Human Cells.

MW :32.5kD.

Recombinant Human TXNDC15 is produced by our Mammalian expression system and the target gene encoding Val33-Ser321 is expressed with a 6His tag at the C-terminus. TXNDC15, which is short for oreodoxin domain-containing protein 15, is encoded by FAM172A gene. It is also known as C5orf14. TXNDC15 is a 360 aa. protein, and has 2 isoforms produced by alternative splicing. There is a natural variant location which is S248P and it has a 18 aa. signal peptide. TXNDC15 contains 1 thioredoxin domain. This protein is a Single-pass type I membrane protein and locates at membrane.
