

32-8635: Recombinant Mouse IL-2R α /IL-2RA/CD25 (C-6His)

Gene : IL2ra
Gene ID : 16184
Uniprot ID : P01590

Description

Source: Human Cells.
MW :25.5kD.

Recombinant Mouse Interleukin-2 receptor subunit alpha is produced by our Mammalian expression system and the target gene encoding Glu22-Lys236 is expressed with a 6His tag at the C-terminus. The interleukin 2 receptor alpha (IL2RA), also called CD25, is a type I transmembrane protein that presents on activated T cells, activated B cells, some thymocytes, myeloid precursors, and oligodendrocytes. IL2RA is a member of cytokine receptors family that utilizes the common gamma chain subunit (gc). IL2RA is expressed in most B-cell neoplasms, some acute nonlymphocytic leukemias, neuroblastomas, and tumor infiltrating lymphocytes. IL2RA associates with IL2RB (CD122) to form a heterodimer that can act as a high-affinity receptor for IL-2.

Product Info

Amount : 10 μ g / 50 μ g
Content : Lyophilized from a 0.2 μ m filtered solution of PBS, pH7.4.
Storage condition : Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at -20°C for 3 months.
Amino Acid : ELCLYDPPEVPNATFKALSYKNGTILNCECKRGFRRLKELVYMRLGNSWSSNCQCTSNSHDKSRKQVTAQLE

HH

Application Note

Endotoxin : Less than 0.1 ng/ μ g (1 IEU/ μ g) as determined by LAL test.
