

32-8680: Recombinant Mouse HLADG/CD74 (C-6His)

Gene : Cd74
Gene ID : 16149
Uniprot ID : P04441

Description

Source: Human Cells.

MW :19.4kD.

Recombinant Mouse CD74 is produced by our Mammalian expression system and the target gene encoding Gln56-Leu215 is expressed with a 6His tag at the C-terminus. Mouse HLA class II histocompatibility antigen gamma chain (CD74), is a single-pass type II membrane protein that in humans is encoded by the CD74 gene. It contains 1 thyroglobulin type-1 domain. CD74 Plays a critical role in MHC class II antigen processing by stabilizing peptide-free class II alpha/beta heterodimers in a complex soon after their synthesis and directing transport of the complex from the endoplasmic reticulum to compartments where peptide loading of class II takes place.
