

32-8754: Recombinant Human Fibroblast Growth Factor 7/FGF-7/KGF (C-6His)

Gene : FGF7
Gene ID : 2252
Uniprot ID : P21781

Description

Source: Human Cells.
MW :20kD.

Recombinant Human Fibroblast Growth Factor 7 is produced by our Mammalian expression system and the target gene encoding Cys32-Thr194 is expressed with a 6His tag at the C-terminus. Fibroblast growth factor 7 (FGF7) is a secreted protein which is mainly located in epithelial cells and belongs to the heparin-binding growth factors family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. FGF7 is a potent epithelial cell-specific growth factor, whose mitogenic activity is predominantly exhibited in keratinocytes but not in fibroblasts and endothelial cells. It is possible major paracrine effector of normal epithelial cell proliferation.

Product Info

Amount : 10 µg / 50 µg
Content : Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.
Storage condition : Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at -20°C for 3 months.
Amino Acid : CNDMTPEQMATNVNCSSPERHTRSYDMEGGDIRVRLFCRTQWYLRIDKRGKVKGTTQEMKNNYNIMEIRTV
AVGIVAIGVSEFYLAMNKEGKLYAKKECNEDCNFKELILENHYNNTYASAKWTHNGGEMFVALNQKGPVRGK
KTKKEQKTAHFLPMAITVDHHHHHH

Application Note

Endotoxin : Less than 0.1 ng/µg (1 IEU/µg) as determined by LAL test.
